Information

The EL-Skyport Wireless System consists of four different modules

- EL-Skyport Transmitter (Transmitter only)
- EL-Skyport Universal Receiver (Transceiver)
- EL-Skyport Transceiver RX (Transceiver)
- EL-Skyport USB RX (Transceiver)

We only tested the **EL-Skyport Transmitter** and the **EL-Skyport Universal Receiver** (Transmitter) modules.

The EL-Skyport Transceiver RX and the EL-Skyport USB RX modules do have the same HF-circuit as the EL-Skyport Universal Receiver module.

For more detailed information about the differences between these modules please check the file
